Select Experience

● Liar's Dice (Apple Store) - (Google Play)

- ○ An in-person multiplayer phone app of the liar's dice game
- ○ MEAN (or MEIN) Stack Ionic native application for my capstone project (self-taught)
- ○ Random game passphrase from API for 1st player used by the other players as game authorization
- ○ Socket.IO called functions on each page to show in-time interaction with the other devices
- ○ MongoDB deployed on Heroku using the cloud-hosting side mLab.

● parkDIA

- ○ A contract with parkDIA to build an Ionic 2 app for the customer to book parking and locate shuttles
- ○ Using Socket.IO and shuttle API to display shuttle location and ETA
- ○ Utilized client RESTful API for authorization/authentication membership, reservations, & booking
- ○ QR Code Generator used as parking pass to check-in/out

● Gratune

- ○ A venue/attendee integrated mobile app to promote free music in your town
- ○ MERN (React Native) Stack native application group project (self-taught)
- ○ Built authentication and authorization that led the user to only the venue or attendee app
