- TDD

Experience

● Liar's Dice (Apple Store) - (Google Play)
  - An in-person multiplayer phone app of the liar's dice game Ionic Stack
  - This Ionic technology and project was self-taught, built and deployed on the store in two weeks
  - Random game passphrase from API for 1st player used by the other players as game authorization
  - Socket.IO called functions on each page to show in-time interaction with the other devices
  - MongoDB deployed on Heroku using the cloud-hosting side mLab.

● parkDIA - (on the App store early 2018)
  - A contract with parkDIA to build an Ionic 2 app for the customer to book parking and locate shuttles
  - Built a map using shuttle API to display live shuttle location and ETA for pickup
  - Integrated with client RESTful API for authorization/authentication membership, reservations, & booking

● CustomMentor
  - React-Redux web app for Blossom Enterprises linking mentor/mentee relationships
  - Built entire website login and site structure. This boilerplate was used for GA students to learn and integrate their work.

● Gratune
  - A venue/attendee integrated mobile app to promote free music in your town
  - MERN (React Native) Stack native application group project (self-taught) in one week
  - Built authentication and authorization that led the user to only the venue or attendee app
